

HARNESS AND **WORKING EQUIDS**

Course code: WRKE102

 1 April 2024 [Read on The Donkey Sanctuary website](#)

This course focuses on the different parts, functions and adjustments of harness, followed by specific aspects related to working with working equids. A harness is a common aspect of all working equids, regardless of the task performed, and its correct or incorrect use directly impacts their health and welfare.

At the end of this course, we hope that you'll be able to increase your knowledge and have a much better understanding of harness, regardless of whether you are a user or someone who works in the welfare sector, and will be advising other users about harness.

Free online course. Open to all. Self-paced.

The harness is a common aspect of all working equids, regardless of the task performed, and its correct or incorrect use has a direct impact on their health and welfare.

Throughout a series of eight modules, organised in a methodical and systematic way, every aspect directly related to the harness, and the different activities working equids may perform using the harness, will be covered.

*This is an updated version of Accessing Harness (HRNS101) which is no longer available.

COURSE **DETAILS**

The Research and Operational Support of The Donkey Sanctuary developed a research project focused on the best collars for donkeys to use, followed by the more correct and animal-friendly harness and techniques for equids to perform agroforestry activities. This course gathers all that scientific knowledge and present it in a easy-to-understand way, based on practical videos where, step by step, all this information is provided.

So the main idea behind this course is for you to understand first and in detail the different parts, function and adjustments of harness. Allowing you to select the correct one depending on the task equids will perform. After that, we'll see in detail specific aspects related with safety around working with working equids. And later we will cover the use of equids for agroforestry activities. At the end of this course, we hope that you'll be able to increase your knowledge and have a much better understanding about harness, regardless if you are a user or someone who works in the welfare sector and you'll advise other users about harness.

MODULES

1. Introduction;
2. Different parts, functions and adjustments of a harness;
3. Incorrect use of harness;
4. Practical aspects of the use of harness;
5. Use of donkeys for agroforestry activities I;
6. Use of donkeys for agroforestry activities II;
7. Working with two donkeys;
8. Further learning.
