

DIY **PACKSADDLE**

Course code: WRKE108

 1 June 2024 [Read on The Donkey Sanctuary website](#)

We expect that at the end of this course, learners will have made their own pack saddle which fits their working equid well; provides comfortable support for loads carried and avoids unnecessary wounds, thereby helping The Donkey Sanctuary to improve the situation for working equids globally.

Free online course. Open to all. Self-paced.

COURSE **DETAILS**

During the course, we will provide learners with the instructions required to build a pack saddle using recycled and locally available materials. Delegates will learn how to measure their equid to produce a bespoke saddle, and how to maintain the saddle, to ensure their equid avoids developing harness wounds.

MODULES

1. Introduction to the course;
2. Introduction to pack saddles;
3. The Donkey Sanctuary pack saddle;
4. List of materials and tools;
