

DONKEY BEHAVIOUR FOR VETERINARY PROFESSIONALS

Course code: CLNC102

 2 September 2023 [Read on The Donkey Sanctuary website](#)

This course is recommended for veterinary surgeons and veterinary students who may see donkeys occasionally and wish to be more confident in their knowledge and approach to this species.

Free online course for **professionals only**. Self-paced.

COURSE DETAILS

The aim of this course is to share the fundamentals of donkey behaviour which influence the handling and veterinary care of this species. The course covers the evolution of the donkey, how this has influenced behavioural signs of fear and pain and how a donkey's pain can be quantitatively assessed. Handling principles, techniques and pharmacological interventions are discussed to make veterinary visits calmer for the donkey and safer for the professionals working with them.

MODULES

1. Normal Donkey Behaviour
2. Pain Behaviour in Donkeys
3. Modifying Donkey Behaviour
