

# EQUID DENTAL PREVENTION AND TREATMENT

Course code: DENT105

 2 March 2024 [Read on The Donkey Sanctuary website](#)

Participants will develop a deeper knowledge of the underpinning theories of equid dentistry and thereby, aid the promotion of practical skill for the prevention and treatment of dental disorders.

Many common equid dental disorders are preventable in their early stages, so the appropriate application of clinically reasoned treatment has the potential to significantly affect welfare and promote quality of life.

Free online course for **professionals only**. Self-paced.

## COURSE DETAILS

This course will also encompass non-specific skills such as evidence-based practice, clinical reasoning, literature review, communication and reflection. The modules include Equid Dental Prevention, and Equid dental Treatment and Procedures.
