

HOW TO LOOK AFTER YOUR **DONKEYS** **TEETH**

With Gemma Lilly, Equine Dental Technician

 12 August 2019 [Read on The Donkey Sanctuary website](#)

The Donkey Sanctuary has an ambition to help improve the lives of donkeys and mules around the world, by providing relevant up-to-date resources on donkey care, welfare, behaviour, nutrition and veterinary topics. These recordings of live webinars are created to help owners, handlers, carers and the employees of organisations across the world find the information they need to improve the lives of their donkeys.

This webinar recording explores age-related changes and the evidence that high-quality dental treatment will keep your donkey in prime oral health for the longest time possible.

WEBINAR **DETAILS**

Did you know that dental disease has a prevalence of around 70-80% in living donkeys of all ages, and 93% at post mortem? This high incidence shouldn't be acceptable, so we will discuss the common impacts that dental disease has on donkeys. We will also look at some of the indications that a donkey may need treatment in between regular visits.

This webinar will cover the common impacts that dental disease has on donkeys and the importance of looking after your donkeys teeth.

Running time: 90 MINUTES
